## WORK EXPERIENCE

### Web Developer Al- Nahar Solutions

05/2020 - Present

Faisalabad, Pakistan

Working as web application developer main goal to develop the application according to the client requirements and impress the client with our work

### Junior Developer Step Up It Solutions

05/2019 - 03/2020

Faisalabad, Pakistan

Starting Internship and after a few months worked as a junior web developer completed the tasks of the software house and created frontend websites

## EDUCATION

### BS Computer Science Government College University, Faisalabad

07/2019 - 07/2023

### F. SC Pre-Engineering The Concept College, Khiderwala

08/2017 - 05/2019

## SKILLS

Python 3

SQL

API Intergration

C++

HTML5

CSS

BOOTSTRAP

JavaScript

JQuery

Laravel

PHP

React

Machine Learning

Pandas

NumPy

Node.js

## PERSONAL PROJECTS

### Shopify API Integration with Web application (12/2021 - 06/2022)

- I have to connect the **API** with the Web Application and have to fetch all the orders and customer detail from the **Shopify API** and also keep Every Record Order Created in the **database**. Also updated the detail of Shopify shop i.e **creates orders, update orders, update the prices, etc.**

### Courier Service API Integration (10/2021 - 12/2021)

- I have to place all the orders which have been created through the **Shopify API** in just one click and they will be automatically shipped to their selected **Courier service API** like **Daewoo FastEx & Call Courier**

### University Management System (02/2022 - 03/2022)

- In This, we can add teachers, classes, departments, and class time which will be **Auto-Assigned to the teachers** and we can generate **Reports** from it. All **CRUD** operations are done in it and the backend framework I used is **Laravel** & language is **PHP**

### Pak Wheels Car Data Information Machine Learning Python (05/2022 - 05/2022)

- In this project, we get all the latest detailed information about the cars like their price, model, engine no, etc from the biggest car website of Pakistan Pak Wheels using the **Python** programming language and its library **Beautiful Soap** and stored all the information in **CSV** file. I wrote many machine learning models like **Random Forrest Regressor & Decision Tree Regressor** etc

### Heart Failure Prediction Machine Learning Python (03/2022 - 03/2022)

- In this, I have to predict the **Heart Failure** chances of a person according to the information provided to us. This project was made in **Python** programming language and used libraries like **Pandas, NumPy, and matplotlib**

### Boston House Price Prediction Machine Learning Python (03/2022 - 04/2022)

- In this, I have to predict the **price of houses in Boston** and provide information is it the house is a loss or a profit. This project was made in **Python** programming language and used libraries like **pandas, NumPy, and matplotlib**.
